July 23, 2018

Maureen Parsell
Director of Parks & Recreation
Town of Willington
40 Old Farms Road
Willington, CT 06279

Dear Ms. Parsell,

Weekly monitoring of bathing water quality has been resumed for Summer 2018. Enclosed please find the results from water samples taken at *Halls Pond*. The results indicate that the E.coli levels in the water were:

Date	E. Coli Level	Geometric Mean
07/16/18	<10	18.43943658

We will keep you updated by mailing results on a weekly basis. If a situation arises that requires immediate attention we will notify you by telephone.

The Commissioner of Health Services has established that concentrations of the E. coli indicator organism less than or equal to 235 per 100 ml is generally considered satisfactory. A single sample with a concentration of the indicator organism greater than 235 per 100 ml is in excess of that which is normally considered acceptable for bathing and a resample is required. Factors that may influence the growth of this organism include large populations of waterfowl, the number of bathers, and the amount of rainfall received at the time of testing.

If you have any questions regarding these results feel free to contact our office for more information at (860) 429-3325, Monday to Wednesday 8:15 a.m. to 4:30 p.m., Thursday 8:15 a.m. to 6:30 p.m., and Friday 8 a.m. to 12 noon.

Please contact me if the above contact information is incorrect.

Sincerely,

Nina Franzen
Intern, EHHD
